Andrius Kvedaras   Front-end developer

ikandrius@gmail.com • andriuskvedaras.lt

Summary:

I am an enthusiastic Front-end developer with a big passion for web and software development. I'm persistent problem solver, constantly seeking out new knowledge to expand my skill set. I like experimenting with new web technologies, APIs and standards. I love JavaScript and I know its good parts.

Technical Skills:

- HTML5
- CSS3, SASS
- JavaScript, ES6 (ES 2015), jQuery, AngularJS
- Responsive Web Design
- Experience using Git and command line
- Some experience with Node.js and MEAN stack

Personal Projects:

Image Editor   September 2015 – present

Written in vanilla JavaScript, Image Editor is a simple tool to resize or crop images in bulk.

Vocem   July 2015 - August 2015

Written using MEAN stack, Vocem is a custom voting platform. It uses Sockets.io to update poll results in realtime and Chart.js library to show them in a graph.

Initium   January 2015 – present

Initium is a Google Chrome extension written in AngularJs, it is a new tab page replacement with additional features.
