Languages: JavaScript (ES6/ES2015), HTML5, CSS3 (SASS)

Tools: Git, npm, webpack, command line

PROJECTS

ve2ry - github.com/andriuskv/ve2ry

- Developed music player using JavaScript (ES6) that can fetch and play various playlists.
- Used IndexedDb to save imported playlists.

Initium - github.com/andriuskv/initium

- Built Google Chrome extension using Angular 2.
- Used Chrome API to show top visited sites.
- Used Twitter API to fetch user's Twitter timeline.
- Used Dropbox API to make background selector.

Image Editor - github.com/andriuskv/image-editor

- Created web page with image manipulation tools using JavaScript (ES6).
- Used JSZip library to store modified images in virtual folder for downloading.
- Used web worker to manage modified images.

Vocem - github.com/andriuskv/vocem

- Developed single page application using MEAN stack that allows authenticated users to create custom polls.
- Used Chart.js library to display poll results in a graph.
- Used socket.io to synchronize poll results across all poll participants.
