Tools: Git, NPM, command line

PROJECTS

ve2ry   github.com/andriuskv/ve2ry

- Developed music player using vanilla JavaScript that can play local audio files or playlists imported from YouTube or SoundCloud.
- Used IndexedDB to store local audio files.

Initium   github.com/andriuskv/initium

- Built Google Chrome extension using Angular 2.
- Used Chrome API to show top visited sites.
- Used Twitter API to fetch user's Twitter timeline.
- Used Dropbox API to make background selector.

Image Editor   github.com/andriuskv/image-editor

- Used vanilla JavaScript to develop tools that can resize or crop images in bulk.
- Used HTML5 canvas to manipulate images.
- Used JSZip library to package modified images.

Vocem   github.com/andriuskv/vocem

- Developed single page application using MEAN stack that allows authenticated users to create custom polls.
- Used Chart.js library to display poll results in a graph.
- Used socket.io to synchronize poll results across all poll participants.
